

Be Your Own Hero

Teaching safe driving habits doesn't begin when a teen driver turns 15. Little eyes are in the back seat watching what the driver is doing every ride. Impact Teen Drivers has a free Elementary School curriculum that is engaging, educational, and empowers young passengers to build life-long healthy habits inside of a car. Students will learn the importance of seat belts, speaking up when they feel unsafe, and having passenger power to stay safe each and every ride.

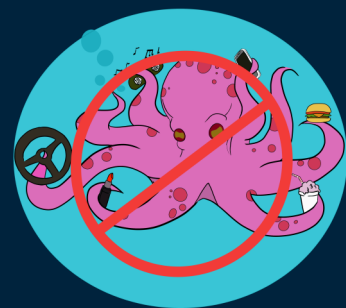

DIY Projects

Role Playing

Outdoor Games

Why Is This Important?

Car crashes are the leading cause of death among children in the United States, but these deaths are preventable. Thousands of children are at risk on the road because they are not buckled up or properly fastened in a child safety seat. Set your child up for success by developing life-long positive and safe habits in the car.
